

THE MODIANO FAMILY TREE

The family tree of the Modiano family contains about 3,400 names. It can be searched by the ordinary search capabilities of your computer, but here is some advice on how to obtain results: Because of tradition, the list is very repetitive since children usually inherit the first names of their grandparents. To identify people more accurately the name of the father is frequently inserted between the first and last names. Therefore when looking for instance for “Isaac Modiano”, will not spot “Isaac Moise Modiano”. Therefore, if the first straightforward attempt fails, search for “Isaac”. This may be more time-consuming, but more likely to produce results. Another problem is that when one has been given the name “Moshe” he might appear as Moise or Maurice or a hundred other westernized variations. This trend is even more prevalent among women. What I have done frequently is to list the given name in brackets as in “Maurice (Moise) Modiano”. The safest way, again, is to search by first name. Finally, the most practical way of searching such a list is by using the (non-Modiano) family name of the mother or spouse, if available.
