

UNKNOWN MODIANOS

Since this genealogical research was launched in 1991, the names of some 3,300 Modianos, descendants and spouses were pinned on our family tree. However it is clear that there must be hundreds more who are unaccounted for. This is evident from the fact that several branches from the 18th, 19th and 20th centuries have long lists of sons and daughters most of whom certainly created families whose descendants eluded this search. The list of names that follows comes from a variety of sources – consular archives, census records, telephone directories, and other lists. The purpose of this new section is to solicit your help in identifying these Unknown Modianos and weave them into the fabric of our genealogy, so they can take their place on the family tree. Your help will be greatly appreciated.
